HOW TO MEASURE YOUR RING SIZE

If you have a ring that fits the finger you would like to wear your ring on, match it to the closest whole size circle below. If it sits between two sizes, you are a half size. Try to use a ring that matches the width of the ring you want to buy. Wide band rings generally require a slightly larger ring size than thin band rings. Also, use a ring that fits well, not too snugly or too loose, in most seasons. Remember your size can fluctuate when it's cold or hot as your finger swells or shrinks with the weather.

Please call or email us at Bone Jour Jewelry if you would like some help.
