

Instructions:

Print the ring sizer, and trim with scissors. Make a small slit where the diagram is marked with an arrow.

Place the ring sizer comfortably around the finger you want to measure, by slipping the pointed end through the slit with the numbers facing out.

Secure the ring sizer by pulling the pointed end snugly around your finger, like a belt. Be sure it's not too snug, you should still be able to slide it over your finger.

Your approximate ring size should be the number that appears where it says 'read size here'.
